PROFILE

As a dedicated Software Engineering student at Okan University, I am driven by a passion for technology and a clear vision to specialize in Cloud Engineering. I am highly motivated and constantly seeking out new skills and techniques to broaden my expertise and make meaningful contributions to the ever-evolving tech landscape. I possess strong analytical skills and proficiency in various programming languages such as Java, Python, and JavaScript. With a solid foundation in software development principles, I am equipped to tackle complex challenges and drive innovation in the realm of Cloud Engineering.

PROJECTS

Front end website

HTML, CSS & JAVASCRIPT
2024

Made a multipage front end business website for a school project, Utilised Html,css and javascript in this project.

Portfolio website

HTML & CSS
2023

Made a personal website with a portfolio of my projects, bio and my contact details.

Train booking system

Built in C++
2022

Made a C++ application for a school project where it prints out the available seats and the user chooses a seat or multiple seats and ends it when they're done. then it prints out the total bill for that session
